

Threat:

The Smooth Talker

Drivers:

Financial gain,
data theft

Techniques:

Social engineering,
spoofed phone numbers,
pre-recorded messages

The Vishing car isn't just about speed, it uses cunning manipulation to dial into the vulnerabilities of its opponents, using voice calls to extract sensitive information.

It's a reminder that not all threats come through screens—sometimes they come through unexpected phone calls.

RACE STRATEGY

Hang up and contact the caller directly using a trusted number from the official website.

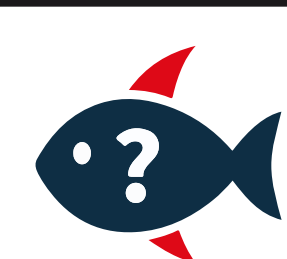

Consider the context. Were you expecting a call?

Guard your credentials. Never share sensitive info like passwords or credit card numbers over the phone.

YOU ARE THE LAST LINE OF DEFENSE AGAINST PHISHING. IF YOU RECEIVE A SUSPICIOUS EMAIL, REPORT IT IMMEDIATELY.
