

SAFER INTERNET DAY

COMPLETE THE CROSSWORD PUZZLE

Across

4. An industry dedicated to protecting systems, networks, and programs from digital attacks.
7. A secret word or phrase used to gain access to a computer system or account.
8. A type of harmful software that can damage or disrupt computers and networks.
9. A square barcode that can be scanned to quickly access information or websites. Some hackers embed malicious links in these.

Down

1. The use of artificial intelligence to create hyper-realistic, but fake videos or audio recordings.
2. A deceptive attempt to obtain sensitive information by pretending to be a trustworthy source.
3. The use of electronic communication to bully a person, typically by sending intimidating or threatening messages.
5. The act of spying on someone's screen in a public place in order to steal their personal information.
6. Small pieces of data stored by websites to remember your preferences and activity.
