

Why Cofense?

It's simple. We stop attacks others miss.

Cofense detects and stops email threats missed by traditional security solutions through the power of human insight + advanced technology.

Trusted by 25% of the Fortune 1000 and thousands of customers worldwide, we are the only end-to-end email security solution powered by real-time, crowdsourced intelligence, allowing you to:

- **IDENTIFY** threats and leverage insights from millions of human reporters
- **PROTECT** your organization by instantly removing malicious emails
- **DETECT** threats utilizing both humans and technology
- **RESPOND** to attacks with automated analysis and mitigation

Avoid a Breach with a Network of Millions of Global Reporters

Our integrated security solutions are driven by actionable data with insights from a global community of 35M+ trained reporters. It's our combination of human-vetted intelligence + artificial intelligence and email attack intelligence that allows us to eliminate active threats, like BEC and ransomware, that bypass traditional email security controls.

Cofense customers can:

- Automatically identify and quarantine email threats that are identified throughout the Cofense Global Network
- Block attacks that have never been seen before
- Utilize the power of automated technology without the worry of false positives

Did You Know?

50% of all email attacks, including Business Email Compromise (BEC) and credential theft, get past traditional email security.

45% of attacks Cofense customers see are automatically identified and quarantined.

88% of threats detected by our AI technology were never detected by legacy solutions.

Our solutions led to a 94% reduction in volume of threats to be manually investigated, easing your SOC workload.

We're focused on leveraging crowdsourced intelligence to help customers prevent attacks from getting to the inbox ... People are fueling the ecosystem, identifying the threats and actually stopping real attacks."

— Rohyt Belani, Cofense CEO and Co-founder.

How It Works

Cofense takes a human-centered and educational approach to ensuring email security.

1 The first step is training employees to spot potential threats by deploying phishing simulations to all users.

When these harmless, but authentic-looking simulations hit inboxes, employees are conditioned to spot and report email threats immediately.

2 As users report potential threats, suspicious emails are quickly analyzed, and threats are automatically removed from inboxes company-wide.

3 Then, a profile is made of the threat and added to the always-growing Cofense database. It's then shared with the rest of the Cofense global network, significantly reducing the chances of a security breach for customers worldwide.

This is the power of the Cofense network effect.

“Cofense: A must-have tool for businesses that enables a security-focused culture.”

“Smart and advanced protection against phishing.”

“Next gen email threat prevention!”

“The most comprehensive phishing prevention system in the world.”

“Save time and effort in the fight for accurate phishing detection and response.”

**Threats are in your inbox, and legacy solutions won't stop them.
With Cofense, you can.**

About Cofense

Cofense® is a global email security company and leading provider of phishing detection and response (PDR) solutions. As the only end-to-end email security solution powered by a global network of more than 35 million users, Cofense applies a unique combination of automated intelligence sources to identify, protect, detect, and respond to email security threats. Utilizing crowdsourced intelligence and machine learning, our platform enables customers to proactively evolve with the threat landscape while better defending and protecting themselves against email attacks. With seamless integration into most major TIPs, SIEMs, and SOARs, Cofense solutions easily align with existing security ecosystems. Threat analysts in our five global phishing defense centers (operating 24x7) work to support Cofense's more than 2,000 enterprise customers, including 25% of the Fortune 1000, across critical sectors such as defense, energy, financial services, healthcare, and manufacturing. With 27 patents, and more than 500 million simulations delivered, Cofense provides the technology and insight to help businesses improve security, remediate threats, and reduce the risk of compromise.
