Cofense[™] Healthcare Solutions

COMPLETE PHISHING DEFENSE FOR HEALTHCARE ORGANIZATIONS

Since 2009, the healthcare sector has experienced over 2,100 major breaches. Today they plague the industry at a rate of one per day.¹

Cofense has you covered. We blend human intelligence and best-in-class technology to stop attacks in progress and prevent breaches. We condition employees to recognize phishing; give them tools to report bad emails; equip your SOC to find and eliminate threats faster; and supply phishing-specific intel to strengthen response and security awareness. It's a complete, collaborative approach to phishing defense.

Key Benefits

- Gain end-to-end phishing protection from the inbox to the SOC.
- Cut through noise to identify and mitigate attacks in progress faster.
- Increase resiliency to phishing by making it easy to report emails to incident response teams.
- Improve overall security by conditioning users to recognize malicious emails.
- Stay ahead of emerging threats with phishingspecific intelligence.
- Gain a proven solution: Gartner has named Cofense a Leader in its Magic Quadrant for Security Awareness CBTs two years in a row.
- Get a great return on your investment: a Forrester study showed that Cofense solutions yield a 336% ROI, with payback in 2.7 months.

Why Cofense?

Two words: innovation and experience. Cofense pioneered the phishing awareness industry. We've trained over 29 million users in 160 countries, reducing phishing susceptibility up to 95% and improving overall resiliency. No wonder Gartner has named Cofense a Leader in its Magic Quadrant for Security Awareness CBTs for two consecutive years. Moreover, 13 million users rely on Cofense Reporter[™] to alert security teams to suspicious emails and Cofense Triage[™], our award-winning incident response and phishing defense platform. All told, Cofense has more enterprise customers than any competitor, proudly serving more than half of the Fortune 100.

Shut Down Attacks in Progress

Cofense Triage[™] cuts through noise to find malicious emails faster. When users report suspicious emails, our automated platform analyzes them; cuts through spam and other noise to identify real threats; clusters bad emails by phishing campaign; and lets you see which other users received them. Triage integrates with the other security solutions to orchestrate response, plus ingests threat information from both users and other threat intelligence sources like Cofense Intelligence[™], our phishing threat intelligence service, to keep you in front of threats. Example: our solutions helped one customer stop an active attack just <u>19 minutes</u> after it began.

Condition Users to "See Something"

<u>Cofense PhishMe</u>[™] is the most awarded phishing awareness solution. It combines phishing simulations based on active threats with relevant education to help users spot bad emails. As the industry sees more attacks using MS Office attachments, only Cofense accurately tracks employees who open them during simulations, whether on mobile, laptops, or desktops. Another Cofense exclusive: board-level reporting that includes industry benchmarking, repeat-victim trending, and customer-specific stats. We also offer an LMS platform, plus free CBTs for smaller organizations.

Train Users to "Say Something"

Your people can't collaborate without the right tools. <u>Cofense Reporter</u>[™] is a one-click solution to reporting suspicious emails, a simple button added to employees' email toolbars. Major advantage: we're the only provider to offer reporting on IOS and Android mobile platforms. With so many mobile-first users, you'll sleep better knowing Reporter is just a click away. Phishing reporting is the vital link between awareness and response. Empower your users to help responders disrupt attacks as they unfold.
