How Does Cofense Protect MSP Work?

Cofense Protect MSP is a cloud-native, advanced phishing detection and email analysis technology. It is built to stop advanced attacks that circumvent basic detection mechanisms baked into the Microsoft O365 and Google Workspace offerings. Users benefit from the power of computer vision plus training + simulation in one unique product.

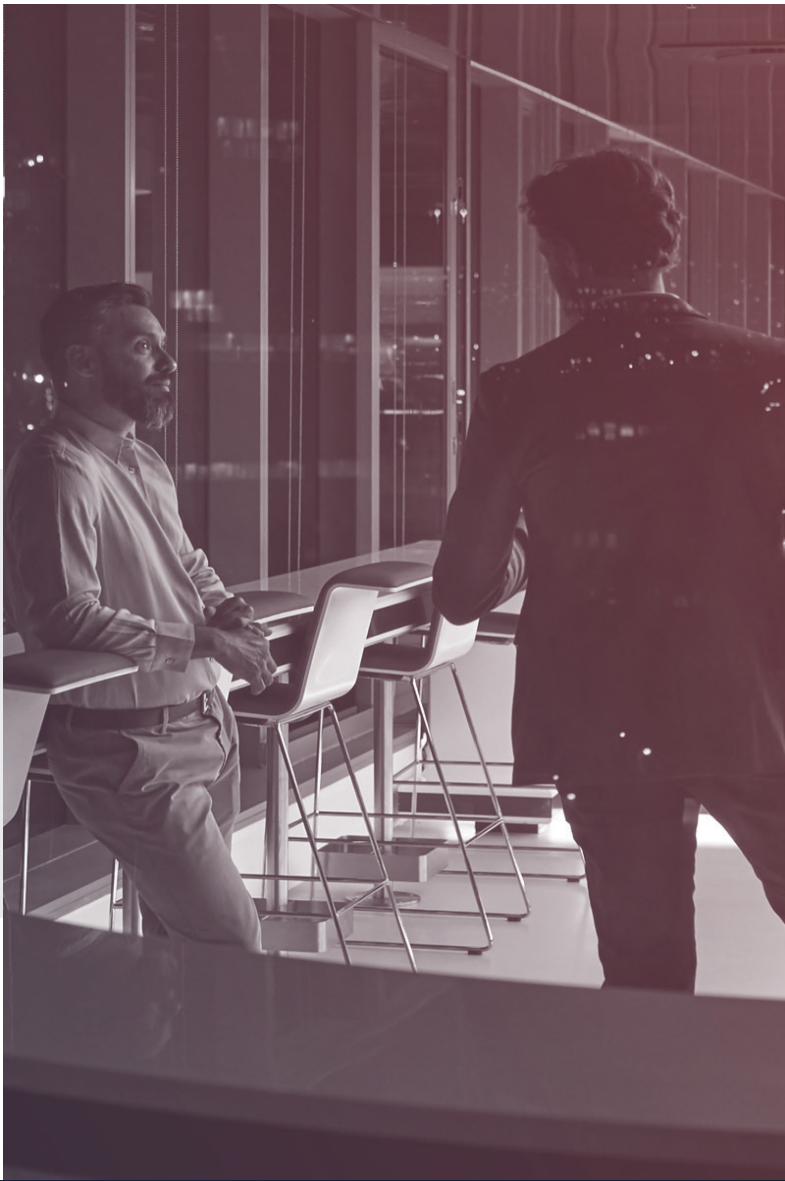
Computer Vision And AI.

Cofense Protect MSP uses our patented technology to detect phishing attacks by visually representing, inspecting, and drawing conclusions on emails, URLs, landing pages, and attachments.

Detection and Training in one Simple UI.

Only **Cofense Protect MSP** delivers both capabilities so you can train your users on what real phishing attacks look like now.

- All templates are exact replicas of recent and broadly used real phish
- based on protected email inboxes
- Set it and forget it - practically zero overhead costs. Simply "toggle on" to enable once-per-month phishing simulations
- Fully automated results reporting, with easy distribution and logo-branding for visibility



Free Evaluation.

Deploy a free evaluation of **Cofense Protect MSP**, onboarding clients of your choice in less than a minute. Our fully managed solution can be deployed alongside whatever tools you are leveraging today for a true side-by-side proof of concept. Let us do the work for you.

Protect Your House for Free.

With a single paying client, we will keep your team protected with NFR licenses.

Cofense Protect MSP is the only complete anti-phishing solution, providing protection and training in a single pane of glass with our zero-second detection and patented technology, designed to keep you and your clients safe.

About Cofense

Cofense® is the leading provider of phishing detection and response solutions. Designed for enterprise organizations, the Cofense Phishing Detection and Response (PDR) platform leverages a global network of close to 30 million people actively reporting suspected phish, combined with advanced automation to stop phishing attacks faster and stay ahead of breaches. When deploying the full suite of Cofense solutions, organizations can educate employees on how to identify and report phish, detect phish in their environment and respond quickly to remediate threats. With seamless integration into most major TIPs, SIEMs, and SOARs, Cofense solutions easily align with existing security ecosystems. Across a broad set of Global 1000 enterprise customers, including defense, energy, financial services, healthcare and manufacturing sectors, Cofense understands how to improve security, aid incident response and reduce the risk of compromise.
