

Fully Automated. Real-Time Protection. Simulation and Training. One Platform.

Are you looking to do more with less but don't want to compromise the quality of your email security approach? Cofense has you covered.

Cofense Protect+ offers everything you need to protect your organization from email security threats. This solution provides protection in real time, is backed by a decade of experience, and powered by Cofense's unique crowdsourced intelligence network. Protect+ combines email protection with highly effective simulation and training all in one platform. And even better, Protect+ is designed as a low-touch, "set it and forget it" complete email security solution so there is no heavy lift for your organization.

How It Works:

Protect+ uses Cofense's crowdsourced intelligence to detect email attacks by analyzing and inspecting emails in real time to instantly determine if they are malicious. Email threats are detected upon arrival and automatically removed from the user's inbox.

Key Benefits

Protect+ offers Protection, Simulation, and Training in one easy-to-use platform.

Onboard in minutes with minimal maintenance to reduce resource strain and increase business efficiencies.

A single screen for configuration information. Customers can set these designations upfront when they initially deploy the solution and then they never have to touch it again.

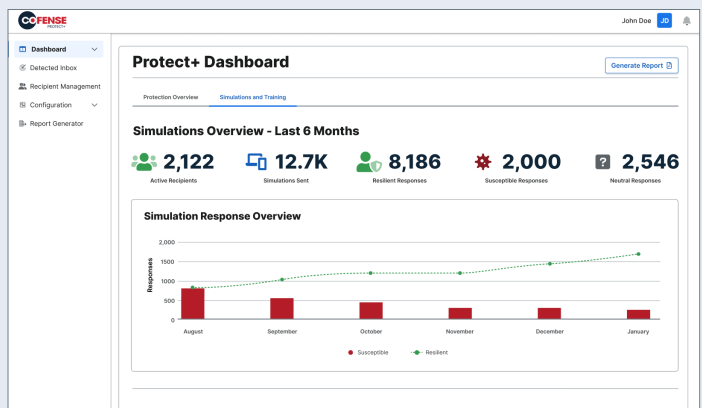

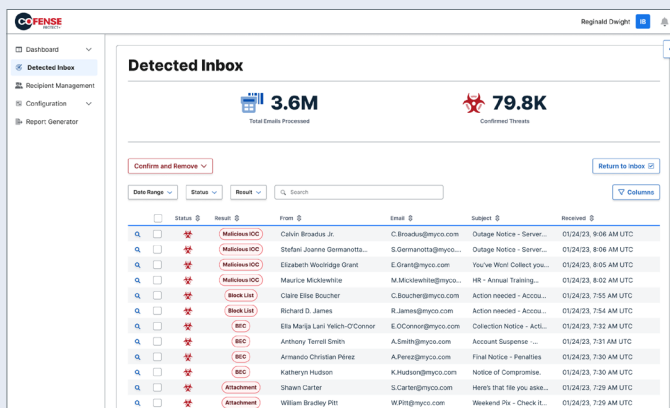

Full-Featured Automated Capabilities:

- Leverage simulations based on relevant, real-time threat protection and adaptive playbooks to ensure your employees are trained to spot the most relevant email threats. This, combined with additional training based on real threat scenarios, offers the highest level of resiliency for employees, strengthening the data protection and compliance of the company.
- Protection from known and unknown threats. Our crowdsourced Intelligence leverages IOC-based matching capabilities to immediately identify confirmed threats and automatically remove them from the user's inbox.
- Protect+ provides relevant, real-time threat protection and adaptive playbooks to ensure your employees are trained to spot the most relevant email threats.
- Fully automated report generation – once a month or upon request, available for Protection and or SAT.
- Easy access to Recipient Management to enable and disable all services from one screen, further simplifying the management of this solution.

User-Friendly Dashboards:

- Consolidated easy-to-use dashboards. Provides data on two key areas - Protection and Security Awareness Training.
- Ability to drill down to more granular individual user information, if needed.
- Detected Inbox shows, in a single view, the status of every email that Protect+ has scanned and detected and identifies the type of the attack prevented (scanned, malicious IOC, attachment, BEC, etc.).
- Gives customers greater context of the exact threat should they need to drill down into the detected email's details.

Protect+ is designed as a low-touch solution to help small- to medium-sized businesses deliver high-quality email security with little impact on the business. When customers choose Protect+, they receive world-class email security – protection, simulation, and training all from one platform. With Cofense Protect+ you can consolidate your email security and SAT approach without compromising quality.

About Cofense

Cofense® is the leading provider of phishing detection and response solutions. Designed for enterprise organizations, Cofense is the only comprehensive email security solution powered by a global network of 35+ million reporters which utilizes a combination of unique intelligence sources to identify, protect, detect and respond to all email security threats. Powered by the Cofense Phishing Detection and Response (PDR) platform, organizations that deploy the full suite of Cofense solutions can educate employees on how to identify and report phish, detect phish in their environment and respond quickly to remediate threats. With seamless integration into most major TIPs, SIEMs, and SOARs, Cofense solutions easily align with existing security ecosystems. Across a broad set of Global 1000 enterprise customers, including defense, energy, financial services, healthcare and manufacturing sectors, Cofense understands how to improve security, aid incident response and reduce the risk of compromise.
